

Hi Neighbour,

This is a friendly note regarding your fire pit use.

I currently suffer from a lung health concern and the smoke from your fire pit can affect my ability to breathe. Closing doors and windows will not help. Smoke can easily waft through small cracks and holes, polluting the indoor air as well as the outdoor air. In no way am I telling you to stop enjoying your yard or entertaining friends and family, but please consider the health of your neighbours with pre-existing conditions when using your fire pit.

I have included some helpful tips from The Lung Association that can benefit all of us.

Thank you for being a great neighbour, I appreciate your consideration!

Kindly,

Your Neighbour

Hi _____,

This is a friendly note regarding your fire pit use.

I currently suffer from a lung health concern and the smoke from your fire pit can affect my ability to breathe. Closing doors and windows will not help. Smoke can easily waft through small cracks and holes, polluting the indoor air as well as the outdoor air. In no way am I telling you to stop enjoying your yard or entertaining friends and family, but please consider the health of your neighbours with pre-existing conditions when using your fire pit.

I have included some helpful tips from The Lung Association that can benefit all of us. If possible, are you able to give my family notice when you plan to light a fire? That will give us time to plan or make the necessary preparations.

Thank you for being an understanding neighbour, I appreciate your consideration!
If you have any questions or would like to talk further about how we can work together I would be happy to hear from you.

Kindly,
